System State Protocol

Vaulting deploys ratio vaults to slow down the erosion of inflation created by the liquidity pool formula, resulting in the creation of multiple copies of the user's crypto assets. By securely locking up tokens in our smart escrow vaults (iPT), and leveraging the power of natural market forces, the protocol generates sustainable and reliable yields over multiple crypto cycles.

- SLOWS DOWN THE EROSION OF TOKEN INFLATION BY 90% AND MORE

- MULTIPLE COPIES OF YOUR CRYPTO ASSESTS USING RATIOS & PHANTOM TOKENS (PSD &PST)

- ALLOWS THE USER TO FULLY PARTICIPATE IN THE CRYPTO ECOSYSTEM (HODL / NFT / LP)

- IF YOU GET RUGGED, IT'S OK. YOU HAVE ANOTHER COPY COMING OVER TIME

- DECENTRALIZED, IMMUTABLE & ZERO COST TO OPEN VAULTS.

- TOKENS ARE LOCK AND CANNOT BE REMOVED TO MAINTAIN FIBONACCHI CYCLES

- WORKS WITH NATURAL MARKET FORCES SUCH AS PRICE AND MARKET CYCLES

System State

50% RPT VAULTS — ENSURE THE USER GETS THEIR ORIGINAL TOKEN BACK

20% IPT VAULTS — SLOWS DOWN INFLATION EROSION OVER MULTIPLE CYCLES

15% AUTOVAULTS — VAULTO CREATED BY THE COMMUNITY

8% PARITY FEES — PARITY SHARE TOKENS (PST) - USERS POOL SHARE

7%% ORACLE FEES — ORACLE / AUTOMATION / DEVELOPMENT
